500 Series connection box range

The 500 Series connection box range offers increased pair capacity whilst maintaining an industry standard footprint. The stainless steel back mount frame verticals support industry standard 10 pair disconnection strips (aka 237A). The doors can be removed entirely using quick release hinges and they can be reversed for left-right opening applications.

Features

- Jumper rings for tidy cable management

- Fixed earth point

- Flexible access plates for top/bottom cable entry

- Doors can be reversed

- Lockable door opens through full 180° for easy access

- Quick release hinges make door removable for initial installation

- Spacers provided for mounting on uneven walls

- 501/502/504 - 30mm deep stainless steel mounting frame(s) fitted

- 510/520/530 – Large document holder in each door

- 510/520/530 – 50mm deep 34way stainless steel mounting frame(s) fitted

Specifications

- Standard finish and colour: Textured light grey polyester
